

Erratum to Cousineau (2005): Confidence intervals in within-subject designs: A simpler solution to Loftus and Masson's method

Three errors were found in Cousineau (2005), Table 2. Here, we present a corrected version of that table.

Three numbers were incorrectly entered in Table 2 from Cousineau (2005). Here we provide the corrected Table 2 (see Table 1 below). The remaining of the text follows without change.

References

Cousineau, D. (2005) Confidence intervals in within-subject designs: A simpler solution to Loftus and Masson's method. *Tutorials in Quantitative Methods for Psychology*, 1, 42-45.

Table 1. Hypothetical results from a repeated-measure experiment with one factor having three levels. Taken from Cousineau (2005) with corrected entries (shown in bold)

Participant	Condition			Mean
	1	2	3	
1	550	580	610	580
2	605	635	665	635
3	660	690	720	690
Mean	605	635	665	635

D. Cousineau would like to thank R. Sekuler and H. F. Volker for noting the errors in the original paper.
